DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 and 4 recite in the preamble "a digital to analog converting circuit". However, the body of the claim does not recite how the digital data is converted to analog output.

By applying the digital to analog converter to the current type data driver, the preamble gives meaning and vitality to the entire claim, hence it is essential to define how the structure can be applied to the current data driver to provide an analog output (see MPEP 2111.02).

Allowable Subject Matter

2. Claims 6-7 are allowed.

3. Claims 1-5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach a digital to analog converter that is suitable to use in a current type data driver of a display that comprises a plurality of transistors wherein the ratio of the channel-width to channel length of each transistor is identical.

Response to Arguments

5. Applicant's arguments, see "Remarks", filed 6/21/2004, with respect to the rejection(s) of claim(s) 1-7 under 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, a new ground(s) of rejection of amended claim 1 has been made (see above). The same rejection applies for original claim 4. The structure of both claims is similar.

It is to be noted that the structure of claims 1 and 4 are different than the structure in independent claims 6 and 7 where the digital to analog converter is intended (suitable) to use in a current type data driver.
